

## Task#1 ( 10 marks )

Open this link <https://demo.productionready.io/#/register> and find the best selector for all elements rounded by red rectangles or the red arrows in the picture below .

*You can use any type of selectors that you know , but please try to use all of them . ( use one selector only for the element ).*

### Things you need in the task :

- 1- Create a repository on github with any name you want .  
ex: ***yourname-qa-tasks***
- 2- Create a spec file in your project and call it *task1* .
- 3- After you solve the task, push the solution for it on github and submit the repo-link to the classroom .

The screenshot shows the Conduit registration page. Red annotations highlight specific elements: a red box around the 'conduit' logo in the top left; a red box around the 'Sign up' link in the top right; a red box around the 'Sign up' button in the center; a red box around the 'Have an account?' link below the 'Sign up' button; three red arrows pointing to the 'Username', 'Email', and 'Password' input fields; and a red box around the 'Sign up' button at the bottom right. The footer contains the 'conduit' logo and a copyright notice: '© 2024. An interactive learning project from Thinkster. Code licensed under MIT.'
